iExpressions
## installation instructions

Automatic Installation

the easiest way to install iExpressions is to use the **aescripts + aeplugins manager app** which is available at
https://aescripts.com/learn/aescripts-aeplugins-manager-app/

cracked by Monter Group → monter.is

CC2019 and newer

in the After Effects menu go to **File->Scripts->Install ScriptUI Panel...**
and choose the file iExpressions3.jsxbin

if jsxbin scripts are greyed out, make sure to choose „Adobe JavaScript Binary file" here
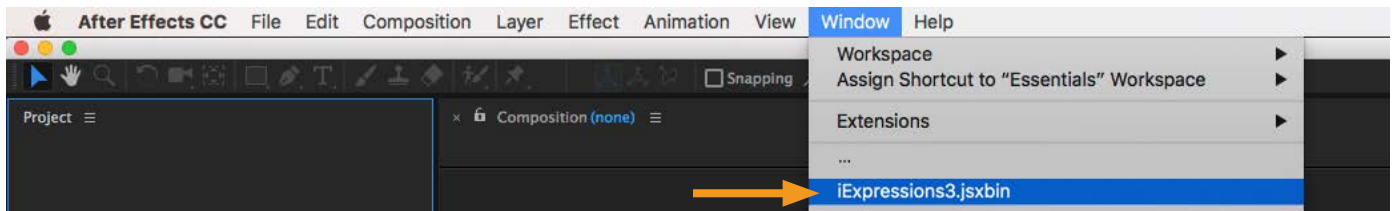

CC2018 and older

copy iExpressions3.jsxbin into the "Script UI Panels" folder
which is usually located here

Windows   C:\Program Files\Adobe\Adobe After Effects CC 2018\Support Files\Scripts\ScriptUI Panels\
Mac OS   /Applications/Adobe After Effects CC 2018/Scripts/ScriptUI Panels/
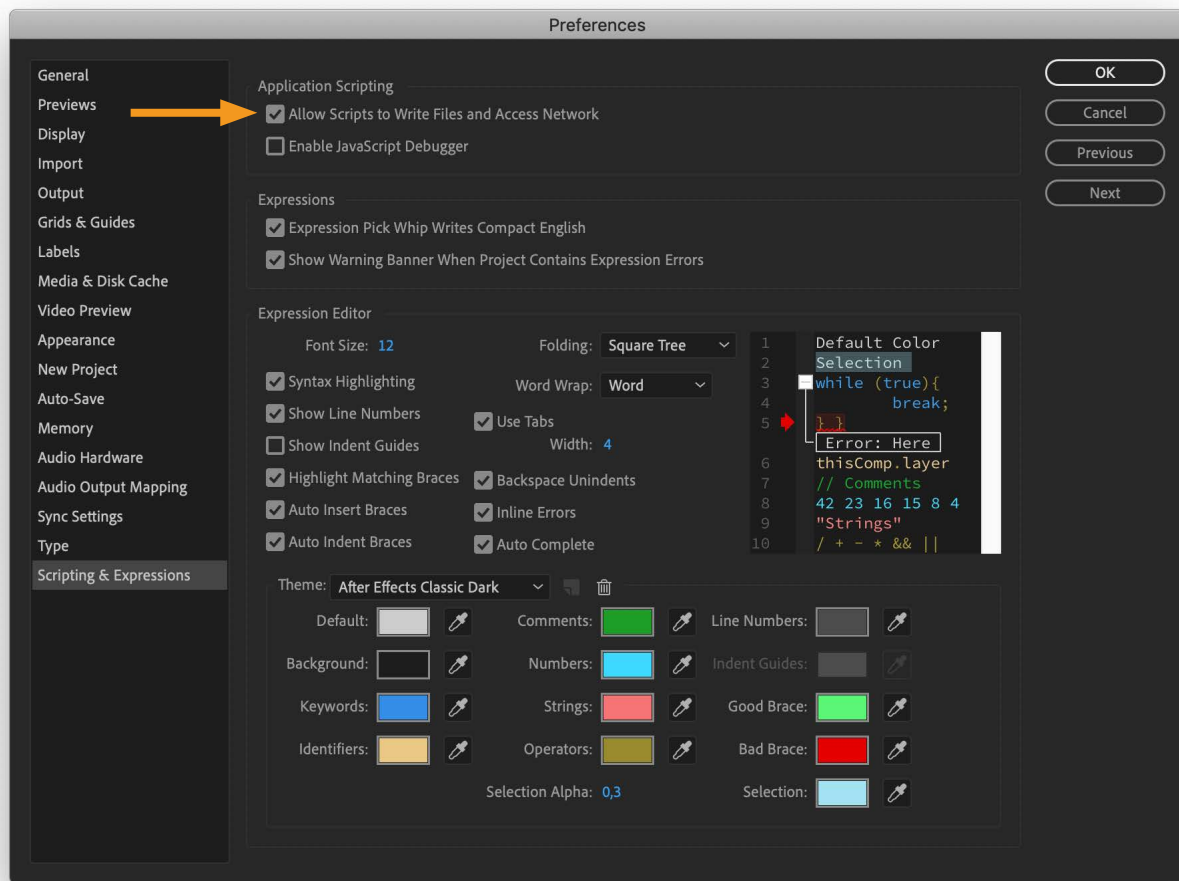

The underlined part is the location of your Ae installation. If you have not installed Ae in the default location or if you have a different version of Ae installed, adjust this accordingly.

Starting iExpressions

1 (Re-)start Ae and **start iExpressions** from the Window menu of Ae

2 If iExpressions complains that **"Allow Scripts to Write Files and Access Network" must be enabled**, enable it in the preferences
(In CC 2018 and older you find this in the "General" section of the settings, in newer versions in the "Scripting & Expressions" section)

Problems?

for more details about how to install scripts see
